GOVERNMENT OF KENYA
MINISTRY OF TOURISM AND WILDLIFE

COVID-19 AND TRAVEL AND TOURISM IN KENYA POLICY BRIEF

JUNE, 2020
There has been an extraordinary growth of tourism recorded in 2020 in the world (1.5 billion), Africa (71.2 million) and Kenya (2.05 million).

Source: UNWTO (2020)
Tourism is one of the most important industries in Africa and contributed 8.5% (or $194.2bn) of the continent’s Gross Domestic Product (GDP) in 2018 (WTTC, 2020).

The sector contributed 24.3 million (6.7%) of the total employment. Domestic spending accounted for 56% of the tourism economy while 44% for international tourism spending comprised 9.6% of the region’s total exports, worth $58.5bn (WTTC, 2020). However, this impressive growth accounts for only 3% of the world share of international tourism receipts.
Kenya has shown an impressive performance in the tourism sector since 2015. The country’s tourism arrivals grew by 3.9% from 2.02 million tourists in 2018 to 2.05 million tourists in 2019 (GoK, 2019) after a 37.33% from 1.47 million in 2017. Domestic tourism numbers in Kenya grew from 3,645,144 in 2017 to 3,974,243 in 2018, recording a 9.03% growth (GoK, 2019).

---

**International Tourist Arrivals in Kenya from 1995 to 2019**

Kenya has shown an impressive performance in the tourism sector since 2015. The country’s tourism arrivals grew by 3.9% from 2.02 million tourists in 2018 to 2.05 million tourists in 2019 (GoK, 2019) after a 37.33% from 1.47 million in 2017. Domestic tourism numbers in Kenya grew from 3,645,144 in 2017 to 3,974,243 in 2018, recording a 9.03% growth (GoK, 2019).
Impact of COVID-19 on World Tourism

- Cancellations and postponement of trips, public events, temporary employment adjustments, and falls in income.
- Exhibitions USD145 billion of cancelled contracts worldwide.
- Airline lost up to US$113 billion in revenue in March 2020.
- Loss of equivalent to a $3.4 billion monthly contribution to the world economy from stopped travel.
- It could take up to 10 months for the industry to recover.
- Stopped 850,000 people who travel each month around the world.
- 50 million jobs cut worldwide - corresponding reduction in jobs of between 12% and 14%.
- Loss of equivalent to a $3.4 billion monthly contribution to the world economy from stopped travel.
Global lockdown has limited travel

Aviation sector heavily affected

Leisure activities stopped

Loss of hotel room revenue of USD 511 million

TF may lose Sh2.5 billion annual 2% Catering Levy

MICE sector impacted by cancellation of gatherings

MICE sector could lose KSh163.56 billion in Kenya

Associated revenue losses could reach $125 million

Airline 36,800 jobs would also be at risk in Kenya in 2020

Impact of COVID-19 on Kenya
According to World Bank (2020), due to COVID-19 pandemic, a major recession is underway for the regional and global economy in 2020 with a drop of real GDP to -2.1 in Sub-Saharan.

Source: World Bank April 2020

Source: IMF WEO April 2020
Cases of decline by 10%, 20%, 30%, 40% and 50% are considered for visitors to parks and reserves. Due to the resilience of Kenya’s tourism industry, a post-COVID-19 spike on park visitation is possible both at annual and monthly bases of analysis. If proper recovery pathways are taken, then the industry could return to pre-COVID-19 level by 2021.
Tourist arrivals figure shows an upward trend with a slump during the year 2015/2016. The trend is expected to continue taking an upward movement in the future (2020-2025) based on historical data (assuming no major interruptions). The future effect of COVID-19 on tourist arrivals will be assessed against this trend.

Tourist departures figure follows a similar trend to that of arrivals except that fluctuations are less erratic. Departures are thus less affected by external and internal factors to the tourism industry of Kenya. Departures from the forecasted trend will reveal the medium and long term impact and effects attributable to COVID-19 and other intervening factors.
# Timeline of COVID-19 Pandemic Impact on Tourism Businesses

|--------------------------------------------------|---------------------------------------------------|------------------------------------------|
| COVID-19 has brought the following short-term impacts:  
• Job losses as employees are declared redundant.  
• Reduction of the numbers of employees in form of unpaid leaves.  
• Laying-off of temporary workers.  
• Implementation of pay cuts.  
• Severe loss of revenues.  
• Unpaid cost of operating the businesses such as unpaid rent and utilities.  
• Cancellation of existing bookings and zero booking of fresh ones.  
• Temporary closure of travel, tourism, and hospitality organizations. | COVID-19 will result in the following intermediate impacts:  
• Reduced international tourists’ bookings.  
• Low business even after recovery.  
• Low capital to get back the business to normal operations.  
• Eviction from current premises due to unpaid running costs.  
• Further loss of revenues.  
• Increased job losses.  
• Challenges in maintaining overheads.  
• Total business closure.  
• Increased borrowings to sustain the businesses. | COVID-19 is likely to have the following long-term impacts:  
• Business closure.  
• Low capital to get back business to normal operations.  
• Eviction from current premises due to unpaid running costs.  
• Decreased number of bookings.  
• Slow resumption of tourism business.  
• Global economic recession delaying international tourism arrivals.  
• Increased marketing activities and thus increased costs of running the businesses.  
• Change in consumer behavior and expectations in social behavior.  
• Loss of international licenses on the side of travel agents due to non-payments. |

Domestic tourism is the main driving force of the Travel and Tourism sector in major economies globally, accounting for 73% in 2017 and 71.2% in 2018.

In Kenya, domestic tourists’ bed-night occupancy accounted for more than 50% of the total bed occupancy from 2015-2018. The number of domestic tourists bed-nights has increased from 2,948,000 in 2014 to 4,559,000 in 2018.

Domestic travel supports and develops local and national economies, provides a rationale for infrastructure upgrading, disperses visitors geographically across regions and to least-visited rural areas, bridges the seasonality gap, creates employment opportunities and cushions destinations in times of crises.
Domestic Tourism Growth Strategies

Target Growing Middle Class - 1,020,681 (36.9%) of employed workforce.

Propose one week national-wide holiday for all working population during August and December school holidays (prolonged festivals holidays).

Repackage tourism product with local market interests.

Make domestic travel more attractive through campaigns.

Provision of accessible information and ease of purchase.

Holidays as non-wage benefits.

Organized road transport to events and attractions.

Development of circuits with specific itineraries.

Research on domestic market preferences.
To enhance recovery after COVID-19, Kenya needs to improve, develop, diversify, re-package and promote other tourism products in addition to the Africa safari and beach destinations.

Tourism Product improvement and diversification may consider various aspects like strengthening Meetings, Incentives, Conferences and Exhibitions (MICE) tourism, birding, cultural tourism, agro-tourism, adventure tourism, Sports tourism products and many others, in relation to the market demand and the resource base of Kenya.

### Key strategies are:

<table>
<thead>
<tr>
<th>Geospatial presentation of Tourism resources in Kenya.</th>
<th>Capturing Experiences and information.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Interpretation of the tourism product.</td>
<td>Packaging Tourism Products.</td>
</tr>
<tr>
<td>Pricing revision for Tourism Products in Kenya.</td>
<td>Digitizing travel and tourism.</td>
</tr>
<tr>
<td>Promote Community-based tourism.</td>
<td>Fight against the Spread of Disinformation.</td>
</tr>
</tbody>
</table>
1. Geospatial Presentation of Tourism Resources in Kenya

In line with making Kenya more resilient to crises, one of the areas that the country can hugely improve on is in the mapping of tourism resources in the country. The country will determine the spatial quantity, capacity, quality, status and distribution of tourism attractions, amenities, activities, accessibilities and ancillary services around the country that will be accessible across the world.

The ultimate goal is to create an Integrated Destination Management System with updated content from all the stakeholders. This will ultimately increase the country’s market share and assist with product diversification. The content will also improve the country’s competitiveness index, which currently stands at position 82.
2. Packaging Tourism Experiences and Information
Kenya as a destination needs to package information on tourism products through the process of knowledge capturing.

Knowledge Capturing is the process of converting the knowledge that resides in people’s heads, and elsewhere, into tangible, explicit knowledge assets. This will involve recording experiences from all forms of tourism in Kenya in a format that can be stored, further.

The packaged information from knowledge capturing and other sources will then be shared in form of media such as text, audio, videos, images, graphics, etc. Different media could be used that includes website, social media, emails, narratives at the attractions etc. This information will add value in product packaging and marketing, and prolong the product life cycle in line with the recommendations given in the National Tourism Blue Print 2030, developed by the Ministry of Tourism and Wildlife in 2017.
3. Interpretation of the Tourism product

Interpretation is an educational activity which aims to reveal meanings and relationships through the use of original objects by firsthand experience and by illustrative media, rather than simply to communicate factual information.

This will increase the visitor’s understanding, awareness and appreciation of nature of the tourism product hence providing an enjoyable and meaningful experience.

4. Packaging Tourism Products

The country should:
• Develop a comprehensive tourism products and services database
• Develop packages or itineraries which will provide a one stop shop, at one, fairer all-inclusive price.
• Create new experiences through packaging, to give a competitive advantage through marketing or advertising.

Products to be packaged
The following are a range of products and services that can be linked in a package:

- Food and beverage.
- Accommodation.
- Built attraction – museum, art gallery, theme park etc.
- Natural attraction – waterfalls, scenic vistas etc.
- Transportation.
- Programming – gourmet cooking, tea/coffee tasting, wood carving etc.
- Guided tour.
- Entertainment – theatre performance, stage show, concert.
- Event/festival.
- Shopping.
- Activity – hiking, kayaking, alpine skiing, snowmobiling.
- Local culture.
New and improved products
There is need to enhance and package the following new and improved products:

- Beach Tourism
- Wildlife Tourism
- Business and Conference Tourism
- Cultural and Heritage Tourism
- Homestays, Airbnb and general sharing economy concept
- Health and wellness tourism
- Medical Tourism
- Ecotourism
- Sports tourism
- Shopping tourism
- Photography
- Flora related tourism
- Voluntourism (Communities and wildlife/nature conservation)
Adventure products packaging
Enhance existing adventure activities and expand the types of activities offered at key nodes, e.g. through activity centers, to include:

- Hiking
- Mountain biking
- River rafting
- Zip lining/bridge swings
- Mountain/rock climbing
- Bungee jumping
- Scuba diving
- Entomology

5. Pricing Revision for Tourism Products in Kenya
A major challenge facing the tourism industry in Kenya is the relatively high price of the tourism products.

There is need for a study to determine the best prices for hotels, parks, attractions etc. through economic models, in order to remain competitive.

Methods such as Willingness to pay (WTP) and Willingness to accept compensation (WTA) will be used to revise prices for commodities with markets (such as hotel rooms, food and drinks, transport and communication, and Non-market commodities in tourism especially environment-based resources such as parks and reserves, recreational spaces, and museums.)
6. Digitizing travel and tourism

Knowledge and Experiences Capturing and Sharing for Kenya Tourism Industry

Interpretation of the tourism product

Geospatial presentation of Tourism resources in Kenya

Digital marketing

Fight against the Spread of Disinformation

Creation of Integrated Destination Management System
7. Promote Community-based Tourism

Development of unutilized rural homes for tourism through the adaption of models such as Albergo Diffuso.

8. Fight against the Spread of Disinformation

Key organizations and structures-including, travel and tourism industry stakeholders, community and faith-based organizations, village leaders, and local governments-need to be involved in the effort from an early date to support the response and to help tweak it for maximum effectiveness in each local context. There should be mainstream and social media effort to counter negative information. This could be spearheaded by the Kenya Tourism Board.
